FIRE CERTIFICATE (PERAKUAN BOMBA)

Bomba renewal checklist

Tick these off before your Fire Certificate renewal. They are the items Bomba officers most often look at, and the most common reasons renewals get delayed.

1 Fire extinguishers

- [ ] Right type for each risk area (e.g. CO2 near electrical panels)
- [ ] Gauge needle in the green, pin and seal in place
- [ ] Serviced and tagged within the last 12 months
- [ ] Mounted on brackets or stands, with signs above
- [ ] Nothing blocking access

2 Hose reels & hydrants

- [ ] Hoses free of cracks and leaks, nozzles fitted
- [ ] Valves open and close smoothly
- [ ] Cabinets clear, signs in place
- [ ] Hydrants accessible and marked
- [ ] Tested within the last year

3 Alarm & detection

- [ ] Alarm panel shows no fault lights
- [ ] Detectors clean and not covered
- [ ] Call points intact and visible
- [ ] Bells or sounders heard in all areas
- [ ] Standby batteries in date

4 Sprinklers & pumps

- [ ] Fire pump starts on auto and holds pressure
- [ ] Main valves open and supervised
- [ ] Spare sprinkler heads and spanner on site
- [ ] Storage kept below sprinkler heads

5 Lights, signs & exits

- [ ] Emergency lights work on battery
- [ ] Exit signs lit and pointing the right way
- [ ] Escape routes and stairs clear of stock
- [ ] Exit doors unlocked from inside
- [ ] Fire doors close by themselves

6 Paperwork

- [ ] Previous Fire Certificate
- [ ] Service reports for all equipment
- [ ] Evacuation plan displayed
- [ ] Fire drill records, where required

When to start

3 months before
Walk the building with this list

2 months before
Book servicing and order parts

1 month before
Fixes done, records in one file

Expiry month
Renewal submitted on time

Free pre-renewal check

Our engineer walks your site and gives you a written list of anything that could hold up your renewal. No charge, no obligation.
